

Make a template out of an old file folder. Trace once and cut 5-6 leaves at a time out of dark green construction paper, do the same for the stem only out of brown construction paper. Students glue to their apple.

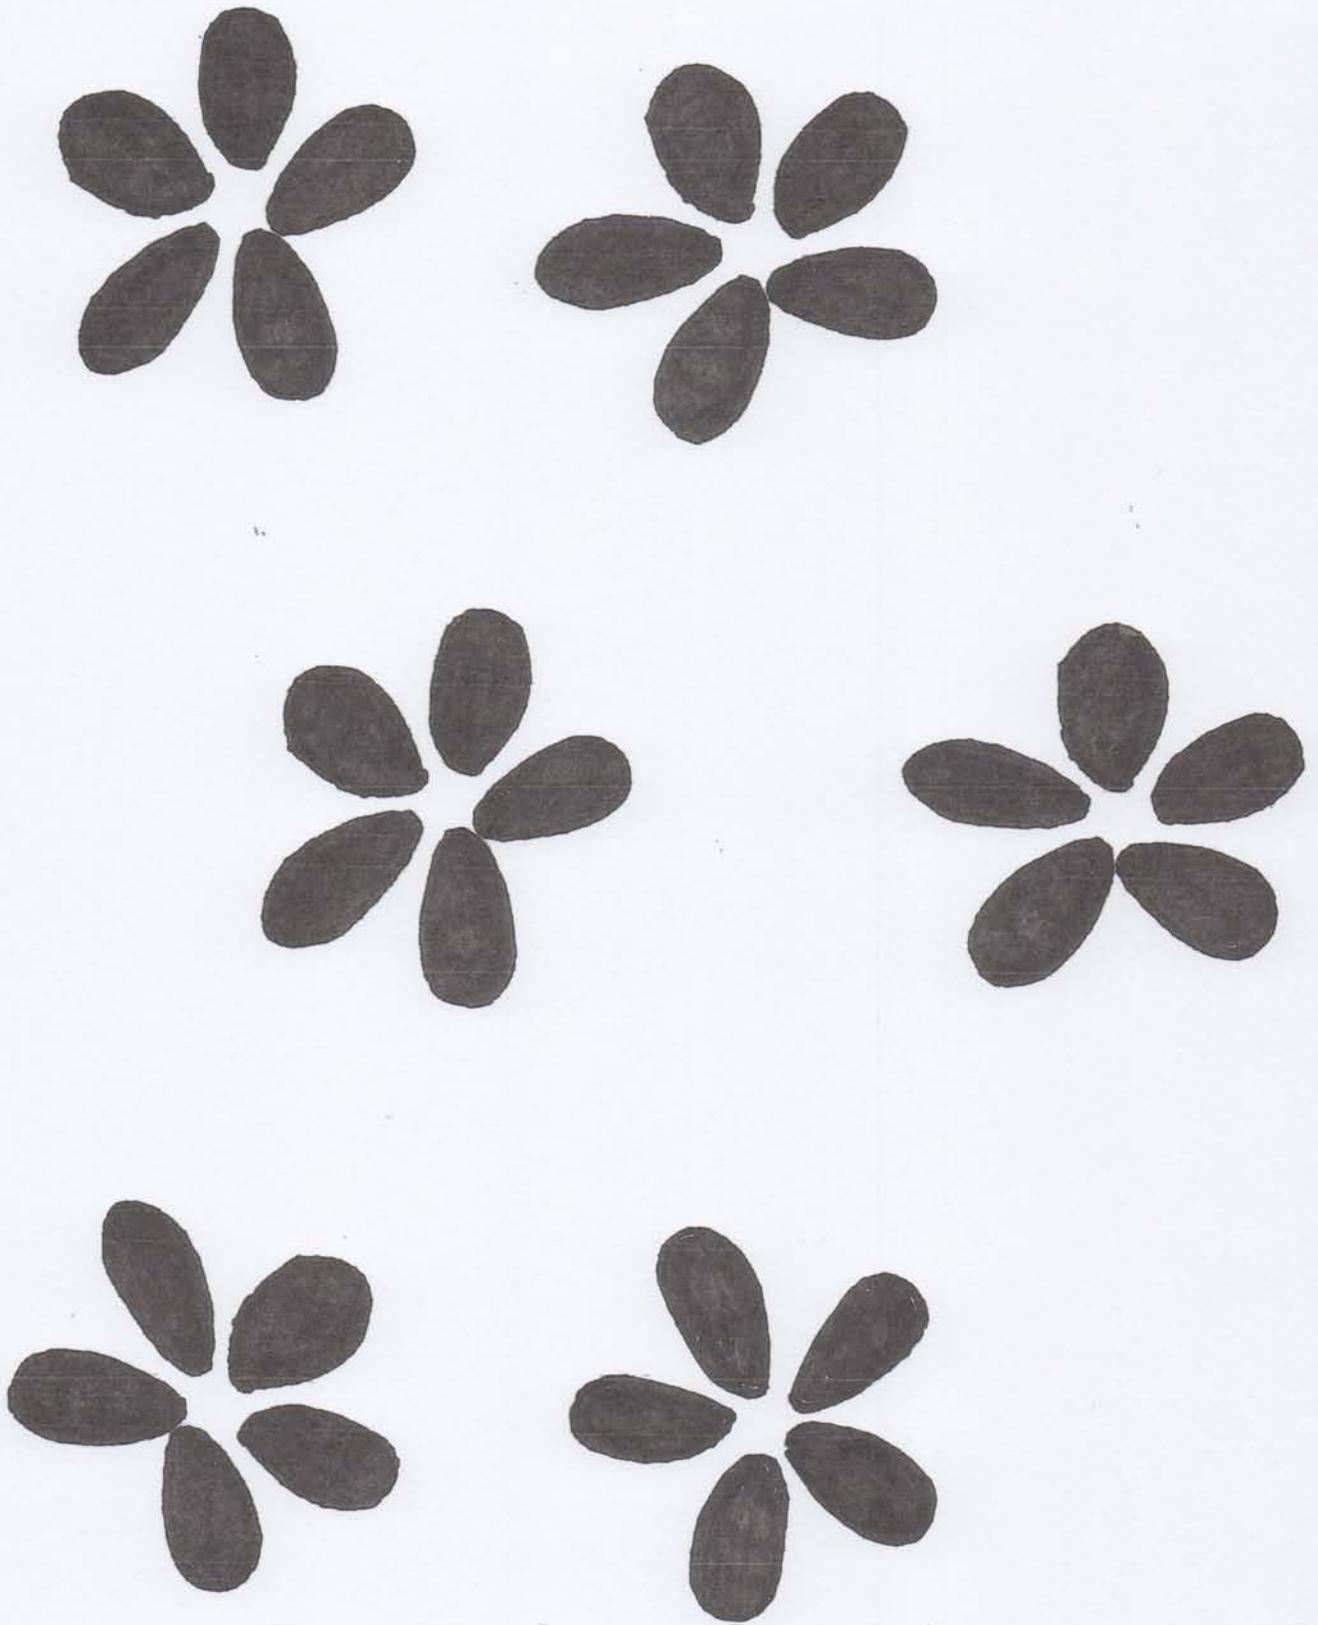

TeachWithMe.com

Painted Apple Bowl.

Run off on white paper. Trim if this doesn't fit your bowl.
Students make the center star by pressing their index finger onto a brown stamp pad and then pressing onto the paper.
To help make this easier, I've included a black star template.
Students place the star under their paper and then press on those areas.
If you'd like this to be a noisemaker, add several spoonfuls of rice or birdseed.

Print several copies of this star template and cut out.
To make finger printing a star easier, have students place this template under their paper so that they can see the outline, and then have them press their fingerprints accordingly.
