Ten Frames

Directions:

Have students COLOR the grids in, use a bingo dot marker to fill them in, or use colored sticker dots. Make a class set for yourself on cardstock, and laminate them, as well as run off student sets for children to make and take home for math practice. Use them in games for one-to-one correspondence with chips and have them use a bingo dot marker to make a pattern for larger sets of numbers.
