

Monthly Shape Tracing Books

- My students LOVE making these little booklets each month. They are just the right size for them.
- I encourage them to have a special Book Box at home where they can keep them. I send a letter home with the Apple Book telling about this program.
- It's important to practice tracing shapes and a cute little book that matches a monthly theme is a fun way to do it.
- I have my students add some color to the cover and write their name under the title. They trace with a "fun" yellow highlighter.
- I allow 5 minutes for this activity. When they are done with their booklet they clean up their station and leave their booklet on the table, then transition to a Tummy Tubby Time activity 'til everyone is done.
- When everyone is done, or when the timer rings, children grab their booklets and we sit on our *Circle Of Friends* carpet. We page through our booklet reviewing the shapes.
- I have them sing this song to the tune of *Are You Sleeping* . We trace the shape in the air with our pointer finger.
- *Where is CIRCLE? Where is CIRCLE? Here it is. Here it is. Circle looks like this. Circle looks like this. Trace with me. Trace with me.*
- Then I'll play a few minutes of "*I Spy A Shape*". They quickly page through their booklets to find that shape. The 1st one who has their hand up, and has found the correct shape, gets a sticker on their booklet. Then we count from 10-0 and the children "Blast Off!" to their lockers to put their booklet in their backpack.
