Place Value Balloons

Graphics copyright DJ Inkers.

Run off the place value slider on construction paper. Choose a variety of colors where appropriate.

i.e. apples can be red, green and yellow; leaves can be all of the fall colors etc.

Run off the 1's, 10's, 100's strips on construction paper.

Students trace the numbers and cut their strips.

The 1st strip without a 0 is the 100's strip, the 2nd is 10's the 3rd is 1's.

Cut the 3 blank strips and fold them in 1/2. Cut on the fold.

Glue one piece of the blank strip, to each end of a numbered strip, so that you can easily pull the strips up and down.

Insert strips into the slits on the place value slider.

Teacher starts by calling out a number and then writing it on the board.

Students manipulate the strips in their slider to make that number.

Teacher calls on students to tell her/him how many 100's, 10's and 1's there are.

Give every child a chance to make up a number and play the teacher.

You can also have students write the numbers on a sheet of scratch paper and then pull their slider strips.

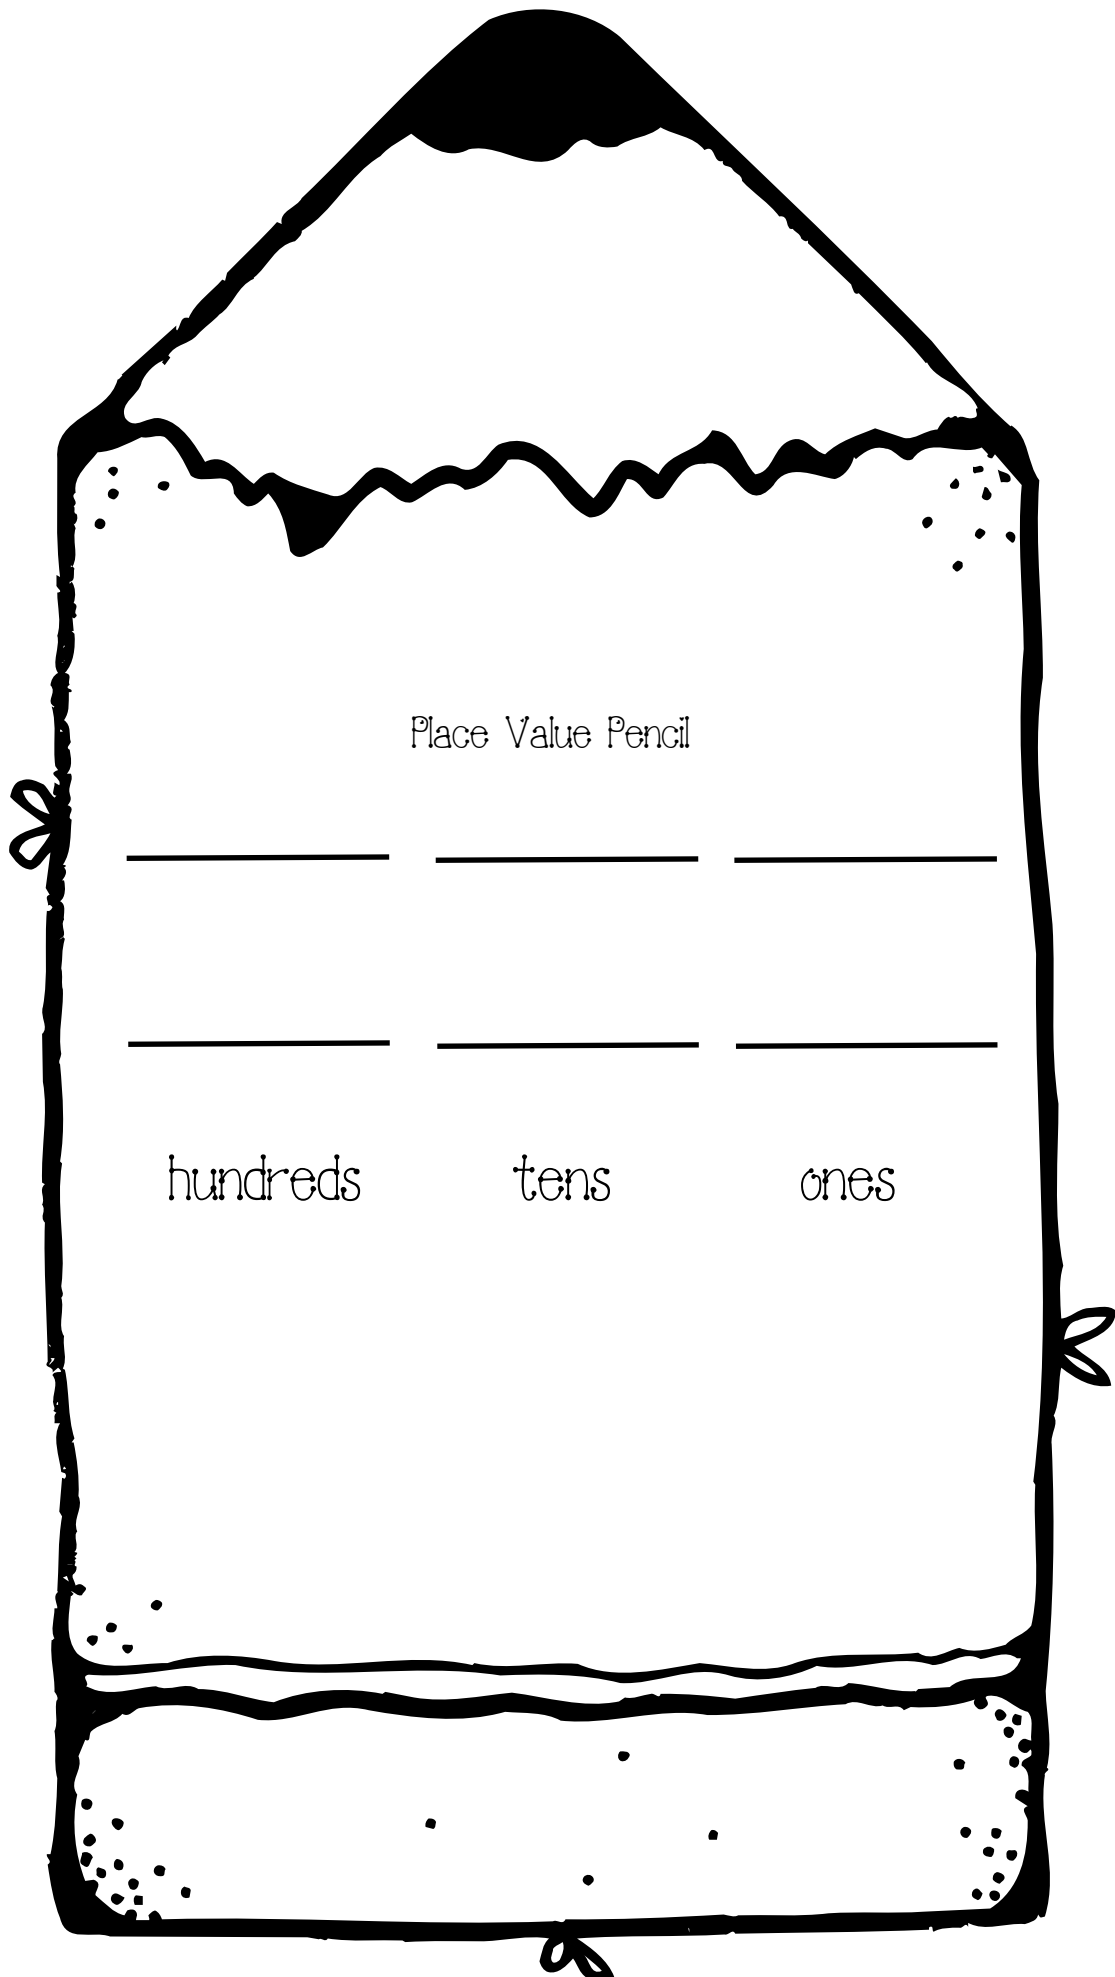

I have designed one for each month + some generic extra's. In no time your students will understand place value!

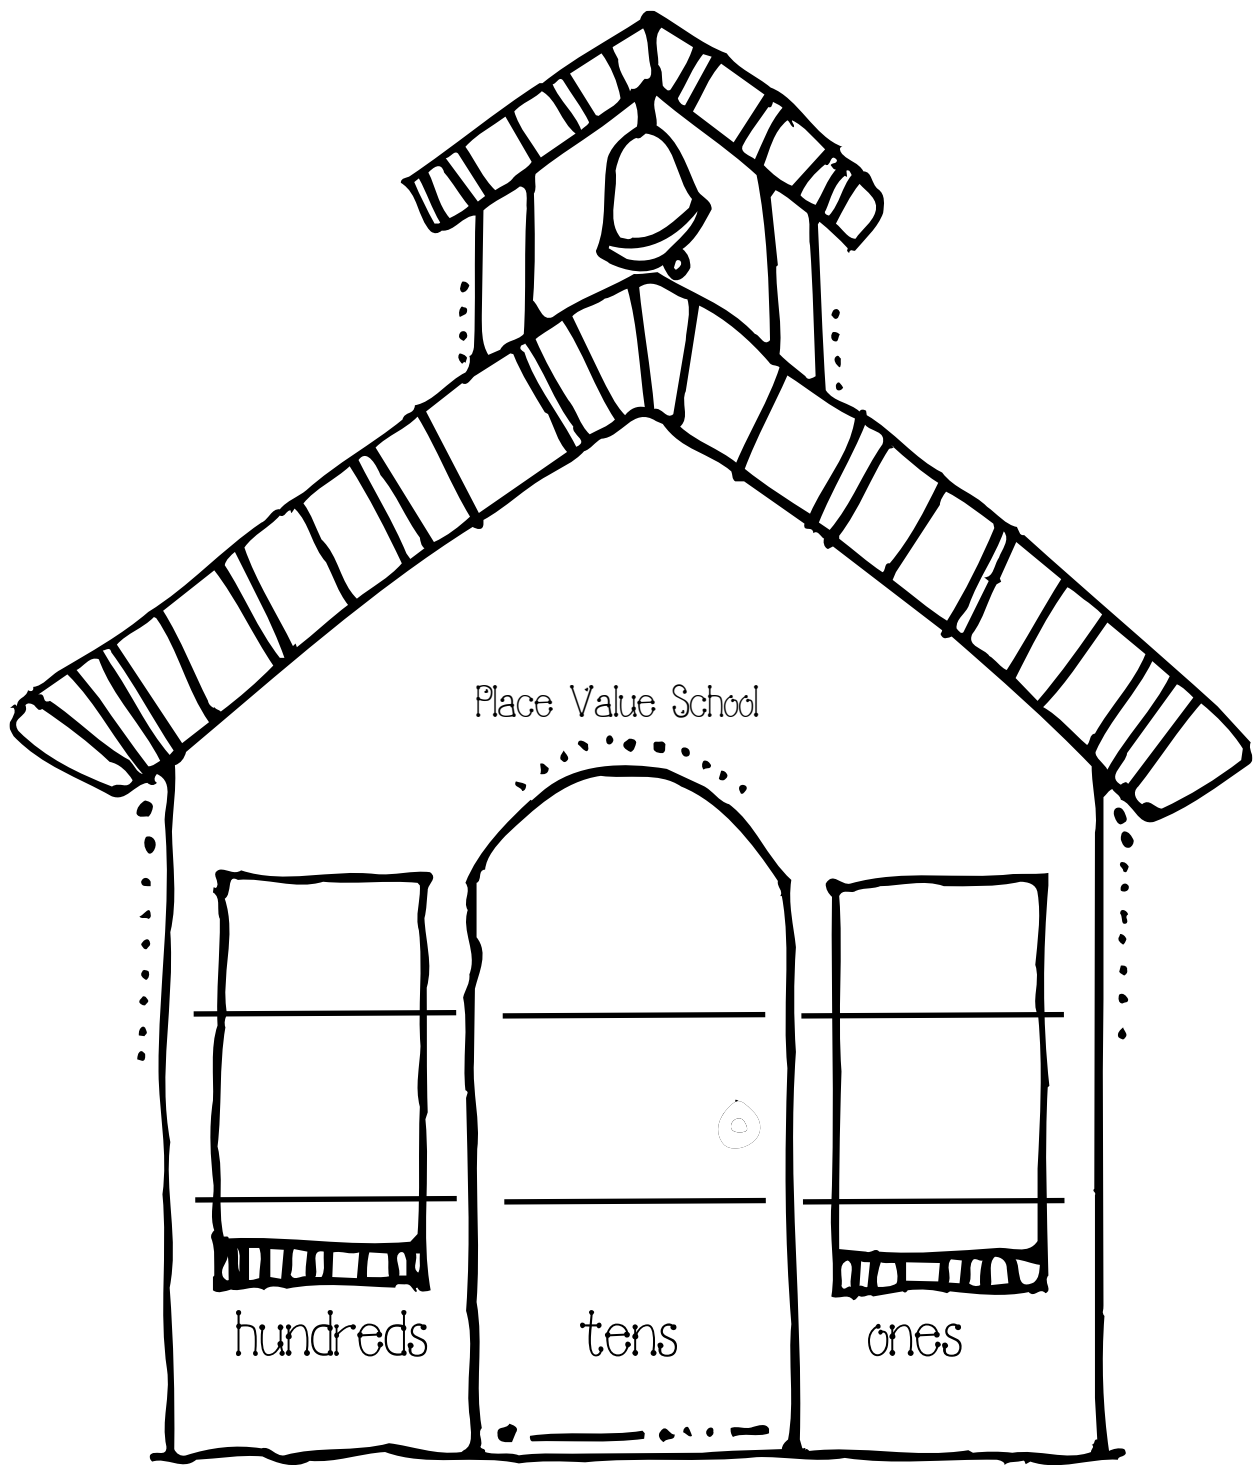

When everyone catches on, you can play "speed" to see who can make the number 1st.
