Number Puzzles & Cards

Directions:

- Make color copies of the masters on white construction paper.
- Laminate them.
- Cut out the puzzles and keep the separate sets/ sections in two separate envelopes.
- Children can play with these as an independent center, or use them to choose a partner when dealing with a small group of children 10 or less.
- Use these as pocket cards when reading number books.
- Use these as word-wall word cards.
- Use them as flashcards.
- Have children play with them like a Memory Match game.
- Make an extra set and send it home with a child who needs one-on-one help with a parent.
- Run off regular sets on copy paper and have students make their own set of puzzles to play with at home.
- Make them into a flipbook and have students sequence the numbers.
- Play “Speed” with the cards and have students see how fast they can put the numbers in order from 1-10. Make two sets and have them play speed against you or a partner.
